

# How we can help

## SME CERTIFICATION

Cyphra is your local Cyber Essentials Certification Body. We can help support your business in achieving Cyber Essentials certification and if required assist you to remediate any weaknesses identified.

### Cyber Essentials Self Certification

- Cyphra register you for Cyber Essentials
- You complete an online questionnaire
- We validate your responses
- Certification awarded subject to compliance

£300

## SUPPLY CHAIN ASSURANCE

For larger organisations who may have concerns over the cyber hygiene of their supply chain, we can help you by using the Cyber Essentials framework to provide you with assurance on your current suppliers.

### Cyber Essentials Assisted

- Cyphra register you for Cyber Essentials.
- We guide you through the requirements and provide feedback
- Should you have areas of non-compliance we can help you remediate these.
- We complete the Cyber Essentials questionnaire.
- Certification awarded

Prices from £950

### Cyber Essentials Plus

- Once Cyber Essentials is achieved, we register you for Cyber Essential Plus.
- We conduct security testing and auditing.
- Should you have areas of non-compliance we can help you remediate these.
- Certification awarded

Prices from £1,250

### Supply Chain Assessment

- Contact Cyphra to discuss your requirements
- We work with you to identify scope of the assessment.
- With the agreement of your suppliers we security test, audit and report against the Cyber Essentials framework.

## Cyber Security risks facing your business

Many SMEs fail to recognise that they face the same cyber security challenges as larger enterprises and as a result are not doing enough to manage the risk.

The HM Government 2015 Information Security Breaches Survey shows that:

74%

of small businesses in the UK had a security breach.

£75k -  
£311k

is the cost to a small business of its worst security breach.

38%

of small businesses were attacked by an unauthorised outsider

## The Cyber Essentials Scheme

Cyber Essentials is a Government-backed and industry supported scheme to help businesses protect themselves against growing number of cyber threats. The Cyber Essentials scheme provides both small and large businesses with clarity on good basic cyber security practice. By focusing on cyber hygiene, your company will be better protected from the most common cyber threats.

## Benefits of Cyber Essentials certification

- Reduces the likelihood your organisation will experience a security breach with its associated financial and reputational impacts.
- Demonstrates to investors, customers, insurers and trading partners that you are proactive in taking essential steps to manage the risks.
- Gain competitive advantage by ensuring you have the appropriate credentials to meet the requirements of supply chain partners or to bid for certain UK Government tenders.
- Support data protection compliance.
